

Querying the FileSystem with GraphQL

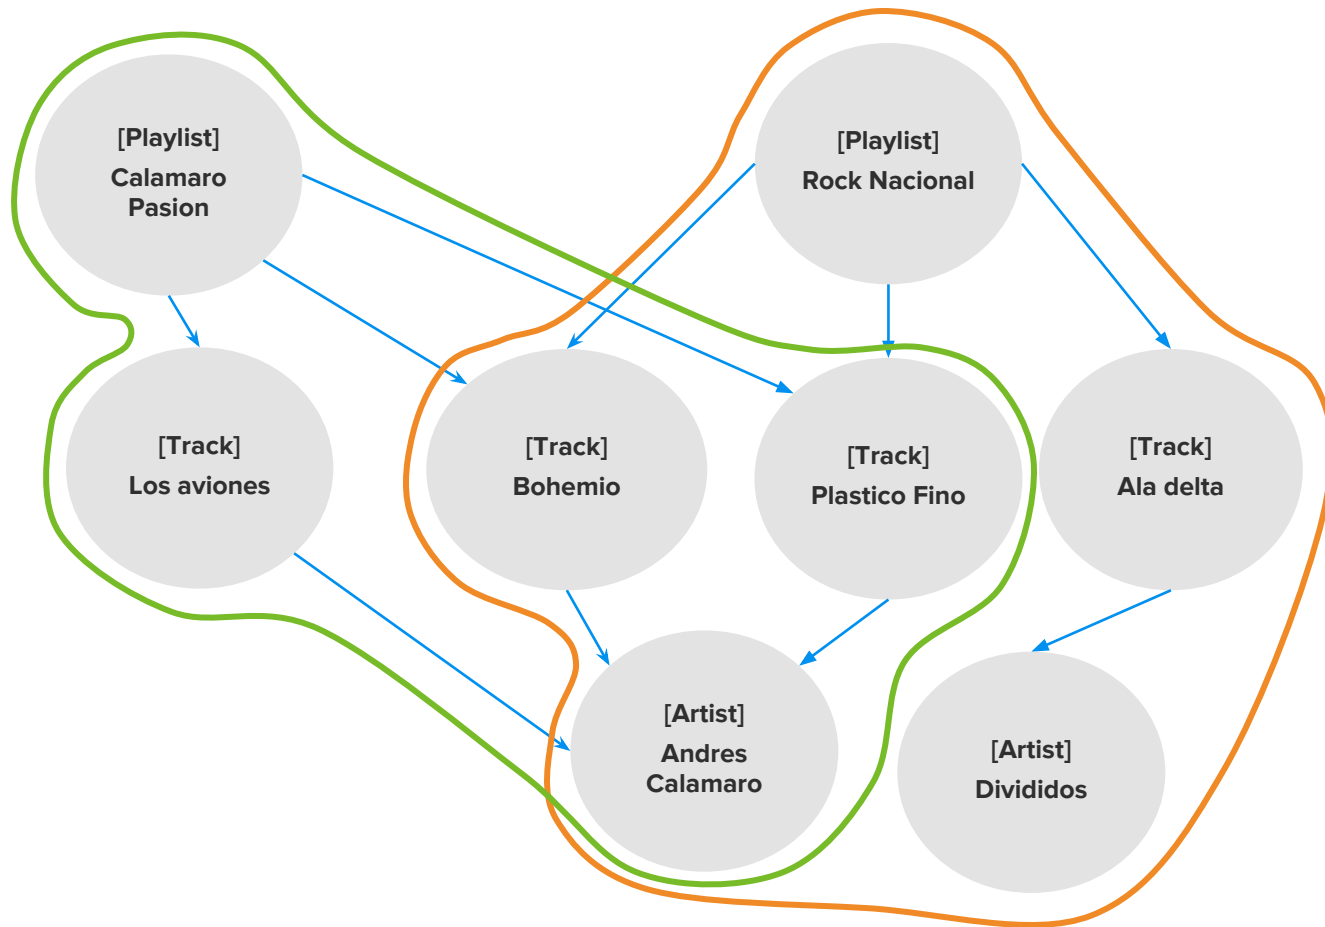

Alan Accurso - @aaaccurso

Sebastian Urbina - @SebUrbina

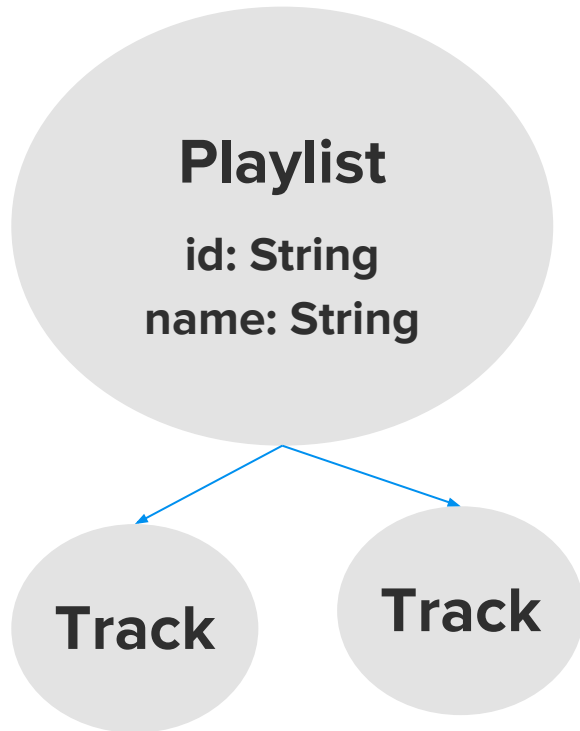

GraphQL

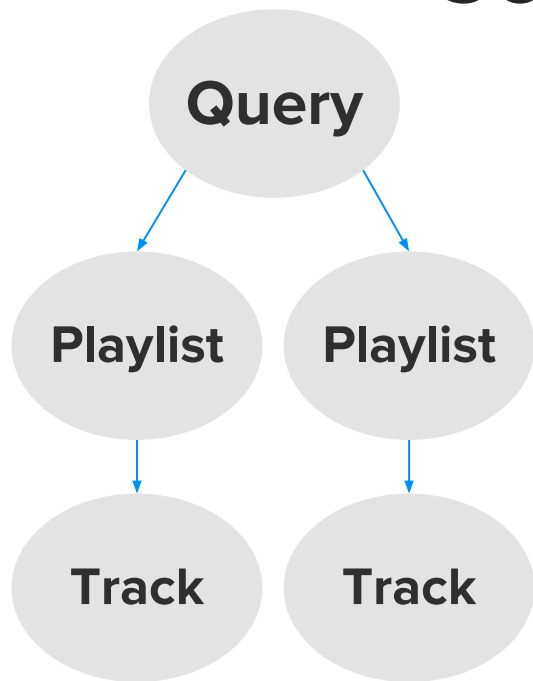

Declaración de un tipo

```
type Playlist {  
  id: String  
  name: String  
  tracks: [Track]  
}
```

Consultas - tipo Query

```
type Query {  
  playlist(id: String): Playlist  
  playlists: [Playlist]  
  artist(id: String): Artist  
  artists: [Artist]  
  track(id: String): Track  
  tracks: [Track]  
}
```

Consultas - ejemplo

```
query getPlaylist {  
  playlist(id: "playlist-1") {  
    id  
    name  
    tracks {  
      id  
      name  
      artist {  
        name  
      }  
    }  
  }  
}
```

Consultas - respuesta

```
{  
  data: {  
    playlist: {  
      id: "playlist-1",  
      name: "Rock Nacional",  
      tracks: [{  
        id: "track-1",  
        name: "Ala Delta",  
        artist: {  
          name: "Divididos"  
        },  
      }],  
    },  
  },  
}
```

Resolvers - ejemplos

```
type Query {  
  track(id: String) : T,  
}  
  
type T {  
  id: String,  
  name: String,  
}
```

```
const tracksData = {  
  track1: {  
    id: 'track1',  
    name: 'Ala Delta',  
    artistId: 'artist1',  
  },  
};  
  
const resolvers = {  
  Query: {  
    track: (obj, param) => {  
      return tracksData  
        [param.id];  
    }  
  },  
};
```

Resolvers - ejemplos

```
type Query {  
  track(id: String): T,  
}  
  
type T {  
  id: String,  
  name: String,  
  artist: A,  
}  
  
type A {  
  id: String,  
  name: String,  
}
```

```
const tracksData = {...};  
const artistData = {...};  
const resolvers = {  
  Query: {  
    track: (obj, param) => {  
      return tracksData  
        [param.id];  
    },  
  },  
  T: {  
    artist: obj =>  
      artistData  
        [obj.artistId],  
  },  
};
```
